## Summary Details

<b>Requirement:</b>	VDI / DAAS / Applications / Windows 10 Readiness Assessment Workshop
---------------------	--

## Introduction

Camwood provide a service that will enable organisations to consider the impact to the client's business, service and technical of moving to an alternative delivery mechanism for their desktop estate.

From a technology stand-point, these services are predominantly designed for Microsoft Windows based desktops and applications.

This service is ideal for organisations that are examining their current strategy, part of an outsource or preparing for an RFP.

## Current State Assessment

Camwood will take a view of the EUC estate to understand the current, transitional and future state for the client. Aspects covered include the following and the client would be expected to expand on technical, operational and business factors relating to:

- Business Objectives
- Business & Service Perception
- Current Transition / Transformation Projects
- Mobility objectives
- Platforms
- Productivity (eg Office 365)
- Management
- Monitoring
- Service Desk
- Application Lifecycle Management
- Innovation
- Modernisation
- Consolidation / Rationalisation

The service is undertaken over a two-day period consisting of the Current State Assessment followed by Camwood delivering a report and presentation of recommendations going forward. Where applicable, indicative programme costs and savings that can be made will also be presented back to the client.
