APM Healthcheck

ARE YOU MAINTAINING THE
LEANEST APPLICATION PORTFOLIO
YOU NEED?

Application Portfolio Management Healthcheck

Camwood provide an Application Portfolio Management (APM) Healthcheck to assess the complete end to end application lifecycle within the business, to highlight where bottlenecks exist, processes have become disjointed or best practices are being neglected. Camwood's 4 Stage process kicks-off with Discovery, where Experienced Governance and Technical Consultants interview the business Stakeholders, review the incumbent processes & toolsets to gain a complete 360o view of the request, preparation, deployment & retirement processes.

how it WORKS

Understand

Camwood's process kicks-off with Discovery, where Experienced Governance and Technical Consultants interview the business Stakeholders, review the incumbent processes & toolsets to gain a complete 360o view of the request, preparation, deployment & retirement processes.

Assess

Camwood's Consultants will Assess this information against the following critical success factors: Governance Board Effectiveness; Best Practice Engineering; User Satisfaction; License Optimisation; Effective Tool Matching; Cost Management; Process Efficiency; Long Term Management; Forward Path Readiness.

Reporting

Following this assessment Camwood will deliver its report in a half-day workshop for all Stakeholders, detailing how each element of the End-to-End APM Process was assessed, highlighting recommended changes to improve the service, reduce cost and increase user satisfaction.

Action Plan

These recommendations will be accompanied by a Plan for Action, to implement the changes agreed with the Stakeholders in the workshop.
