

# top BENEFITS OF APPLICATION PACKAGING

- Drive Cost Down
- Promote Agility
- Improve User Experience
- Reduced Helpdesk Calls
- Lower Cost of Ownership

## APPLICATION PACKAGING

PACKAGING ALL  
APPLICATIONS FOR ANY  
WINDOWS OR MAC  
PLATFORM

### Packaging all applications

Do you want to drive down the cost of your application portfolio? Are you looking for a more agile application experience? Would you benefit from a lower Total Cost of Ownership?

Camwood's Application Packaging service is provided under a flexible model that can be adapted to suit several types of engagement; hosted onsite, remote from Camwood's offices or through a near-shore partner. Likewise, the service can also be managed through a variety of different financial models: Fixed Price, Per-Application Pricing or as Time & Materials.

## how it WORKS

### Testing

A quick-start application-compatibility tool that helps you to migrate faster by providing a crystal clear view of your current application estate's readiness and its readiness for Win8.1, App-V and/or 64-bit computing.

### Reporting

A summary RAG (Red, Amber, Green) report indicating the status of each application's compatibility with your target platform, showing which apps need no remediation, which need some remediation and which are not compatible.

### Recommendations

The report also includes recommended remediations for the issues identified
