TOP BENEFITS OF APPSTORE

A WEB BASED SELF-SERVICE PORTAL TO YOUR EXISTING DEPLOYMENT MECHANISM, INTEGRATED WITH AUTOMATED VALIDATION AND AUTHORISATION

TOP BENEFITS OF APP STORE

- ✓ Applications delivered in minutes
- ✓ Fully auditable authorisation process
- ✓ Empower management to approve software within their line of business
- ✓ Dramatically improve agility of the business and the experience of the end users

APPLICATION STORE

A store that can be tailored to fit any environment and scale, with an application focused approach, Camwood's Application Store delivers an easy to implement range of application store solutions from our standard out of the box service through to a fully tailored solution each built to the company's business needs for integration, authorisation and ongoing management. Expertise gathered from over 15 years of application migration, development, auditing, engineering and rationalisation gives Camwood a unique perspective in creating business focused consumer experiences.

As part of the service Camwood engage with the business to understand the full requirements of the Application Store from individual requirements, integration into existing systems through to design of the store and the underlying workflows that drive the system.

HOW IT WORKS

TESTING

The end user will be able to search the application store to source any application they require access to. This will be simple to use.

MANAGE APPLICATION APPROVAL

Management will be able to see all applications requests relevant to their job function. They can then approve or deny access to the end user.

REQUEST APPLICATION

Each user will need to request access to the application. This ensures that management are most up to date on which licenses are required for deliverables.

APPLICATION DELIVERY

Subject to approval, the application will be delivered to the end user. This delivers a bespoke service tailored to your business needs, while utilising our application experience to deliver an application store that will be both intuitive to the end user and functional to the IT department.
