CLOUD READINESS

DEVELOP A CLOUD 1ST STRATEGY FOR YOUR BUSINESS

TOP BENEFITS OF CLOUD READINESS

- ✓ Appropriate for both small and large migrations
- ✓ Receive return on your investment
- ✓ An independent, true assessment based on business value

Understanding your Estate's Compatibility

With an application focused approach Camwood are able to offer you something that no one else can offer. This allows you to get to the bottom of how the cloud can benefit your business. Camwood's independence allows us to deliver to you a unique approach that other vendors and ISP's can only claim to take. Camwood will deliver you a clear strategy to prepare for and make the move to the cloud.

Camwood will create, and develop a strategy for your business to move to the cloud. By assessing your applications preparing you for the next step Camwood will build a roadmap with you and a forward path for your applications with ROI at the heart of this evaluation and work with you and your business to rationalise.

HOW IT WORKS

STEPS TO THE CLOUD

Camwood will create a cloud strategy, developing the business case including benefits, timeline, costs and change impact. This will be followed with an Application portfolio analysis and a discovery of your current applications estate.

RISK READINESS ASSESSMENT

During the second stage of the assessment Camwood's consultants will develop a roadmap and forward path for the apps alongside the creation of a document detailing the policies for the roadmap and the application lifecycle.

MIGRATE APPS

Camwood are now able to Migrate your chosen apps to the cloud. During the migration Camwood recommend an Application Rationalisation, ensuring that the apps you migrate are being used to their full license capacity.

NEW BUSINESS MODEL

The consultants are now able to introduce an application development program and create an eco system to enhance future innovation. Camwood will monitor the effects of the cloud migration and measure the results against the ROI estimated.
