

Microsoft System Center Configuration Manager

Camwood offer an SCCM service to help enterprises realise the benefits that Microsoft Management can bring to the business. Whether the primary driver is to enable self service application delivery, drive down cost through centralisation or simply to enable future agility through flexibility by connecting your IT to the Cloud, Camwood leveraging SCCM can help.

Microsoft Partner
Gold Devices and Deployment

Background

With an application-focused approach Camwood offer Microsoft System Center 2012 (SCCM) consultancy to help transform the way application services are delivered to your organisation. Leveraging 15 years experience in application management, Camwood will consult on Best Practice design and configuration to transform the management and end user experience of application delivery in your enterprise through Microsoft's SCCM.

Camwood will help you

- ✓ Standardise the delivery of application services
- ✓ Simplify the management of applications
- ✓ Implement self-service application deployment
- ✓ Predict ongoing application SLA's with confidence
- ✓ Leverage detailed application metering, as part of an ongoing auditing incentive

A fully leveraged SCCM implementation can provide extensive insight into the behavior of applications throughout the enterprise, on desktops, servers and virtual machines. Streamlining the delivery, management & troubleshooting of applications to improve the end user experience significantly.

Extending SCCM's legacy feature set with recent innovations (native & 3rd party) will broaden the scope what has been traditionally thought of simply as a deployment tool, in to an infrastructure that can promote agility, automation, management & control.

Camwood's innovative componentised consultancy model provide s a mechanism to leverage only the expertise and services that suit your enterprise. Whether that be as simple as the implementation of a single server infrastructure with an AppStore front end, or a multi- region infrastructure, leveraging many of System Center's complimentary modules; Camwood's SCCM Service will provide you with the expertise you need.

Camwood offers a shopping list of System Center consultancy services from which to build a solution that fits you enterprise.

Camwood can deliver

- ✓ A design for your SCCM infrastructure, based on gathered business needs.
- ✓ Upgrade your existing SCCM Services
- ✓ Migrate alternative deployment services into SCCM
- ✓ Implement self-service delivery of applications
- ✓ Configure and develop processes for self-service authorisation
- ✓ Design, implement, configure and develop complimentary tools:
 - Application Controller
 - Data Protection Manager o Operations Manager
 - Orchestrator
 - Service Manager
 - Virtual Machine Manager
- ✓ Migrate all applications for SCCM delivery

A well managed portfolio is a pre- requisite to adopting a Cloud 1st strategy; System Center can be leveraged as an invaluable tool to achieve agility & mobility through the Cloud.

System Center Capabilities		
Infrastructure provisioning Enterprise-class multi tenant infrastructure for hybrid environments.	Infrastructure monitoring Comprehensive monitoring of physical, virtual and cloud infrastructure.	Automation and self-service Application-owner agility while IT retains control.
Application performance monitoring Deep insight into application health.	IT service management Flexible service delivery.	Camwood professional services Adding value with over a decade of specialized application, desktop and deployment knowledge.

Related Services

- ✓ Application Store

Why Camwood?

Since 1999, Camwood consultants have honed their skills on hundreds of complex application management projects for companies like RBS, Environment Agency, Tube Lines, Santander, Lloyds TSB, BAE Systems and HMRC.

We offer unique and proven methodologies for application discovery, rationalisation, migration and management. We have also developed a set of software tools, including Application Lifecycle Manager (ALM) and Application Migration Intelligence (AMI), to dramatically reduce the time and cost associated with managing large application estates.

No one understands application change better than Camwood – and no one delivers more comprehensive and focused application lifecycle management services.
