

SERVICES FOR OFFICE 365

Office 365, along with Windows 10 and Enterprise Mobility + Security are core components of the Microsoft 365 operating system.

Camwood's Services for Office 365 assist you to navigate the path to integrate your existing services with Office 365 and transition your workloads in line with the priorities of your business.

Advisory Services for Office 365

Office 365 incorporates a number of different workloads including Exchange Online, SharePoint Online, OneDrive for Business and Skype for Business Online. Camwood's advisory services help you to understand these core components and build a strategic roadmap for moving to Office 365.

During a one-day workshop, Camwood will take you through Office 365 and gain an understanding of your requirements and priorities. After the workshop, a report is delivered summarising the findings, roadmap and next steps.

Office 365
