

MOBILE MANAGEMENT

EMPOWERING THE BUSINESS THROUGH
CHOICE, MOBILITY AND AN AGILE APPROACH
TO MOBILE DEVICE AND APPLICATION
MANAGEMENT

COMMON ISSUES & CHALLENGES

- ✓ Which applications are installed on what servers
- ✓ Appreciating all business factors acting on the portfolio
- ✓ Understanding the influencers on the target platform

MOBILE MANAGEMENT WITH CAMWOOD

Camwood offers a Mobile Device Management Service through Microsoft EMS (Enterprise Mobility Suite) & SCCM that enables the central IT Services to meet the needs of this highly demanding user group, whilst maintaining effective control and management. Camwood's application centric approach ensures a focus on the user experience is maintained throughout the delivery and ongoing management of the mobile estate through EMS.

Every device should behave like personal technology: always on, always available, easy to use & with access to personal & corporate data, from anywhere.

HOW IT WORKS

DISCOVER

Camwood provides through its recommended cloud based toolset, mobile device management, mobile application management, and PC management capabilities; delivering mobile device and application management across the most popular platforms: Windows, Windows Phone, iOS, and Android

ASSESS

Camwood will Assess each of the Business & Technical influencers that act upon the portfolio to develop a Decision Matrix through a collaborative process, providing a tailored mechanism for Forward Pathing each application.

TARGET

Leveraging the Decision Matrix above, Camwood will evaluate each application and provide a Forward Path Recommendation for which platform they should Target to best suit the Business requirement.

MIGRATE

Camwood will work with the incumbent teams to develop a pro-active plan to Migrate the in-scope applications to their agreed target platforms; providing the necessary Consultancy to migrate the application where it benefits the project to leverage such services.
